NO COLLECTING BUYING DISPLAYING OF MARINE LIFE SOUVENIRS

If it's found down there, it should stay down there.

Many of these souvenirs play vital roles in maintaining healthy reef ecosystems by providing a habitat for many different species as well as producing nutrients by becoming **NATURALLY RECYCLED**.

Don't support the trade; if the buying stops, the killing and collecting will too.

Do not take shells or coral from the beach;
please help support marine conservation.
